# Centrix 2.0

- **Central & Flexible**
- *Thinks ahead* & provides unparalleled Levels of *User Confidence & Comfort*

|   |  |
|---|--|
| Highest safety standard with SafeDischarge Technology           | Linux based operating system - Maximum system stability & security |
| Intuitive one-hand operation by 21.5" touch display and JogDial | Step by Step operator guide even for inexperienced users           |
| Li-Ion Battery Power supply                                     | Remote control of important system functions                       |
| Decay plus double surge method up to 80 kV                      | Simultaneous testing and diagnosis with 50Hz slope technology      |

## Centrix 2.0

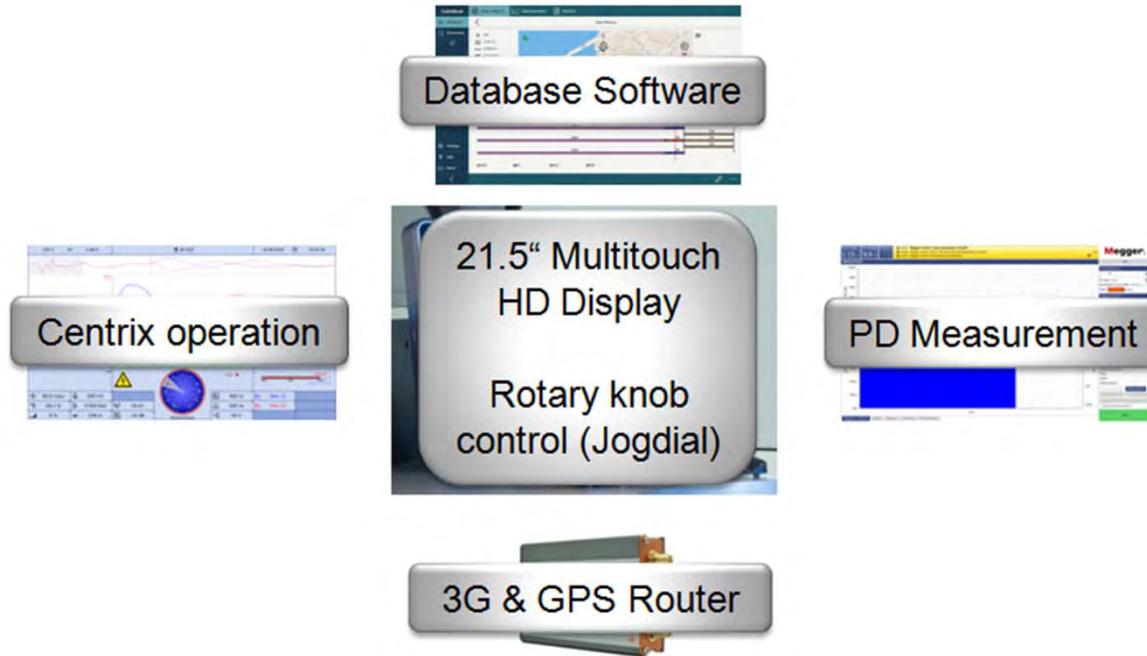

- Highest Safety Standard on the Market
- Integrated *SafeDischarge-Technology*
- Analogue *Residual Voltage Display*
- *Live System Status*

**Megger**  
Power on

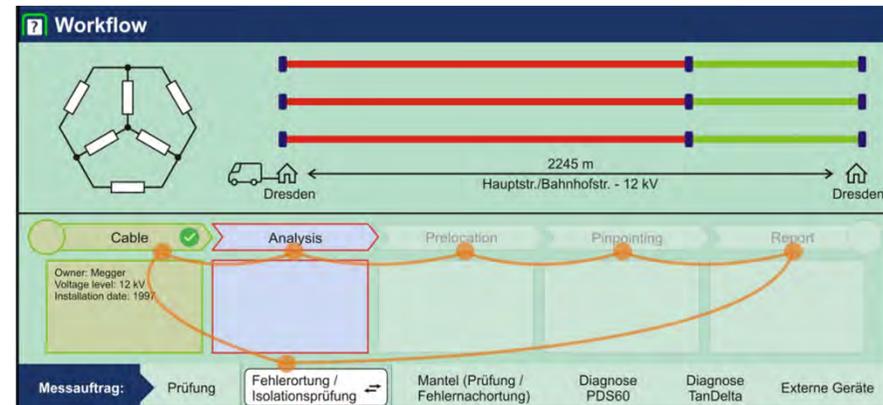

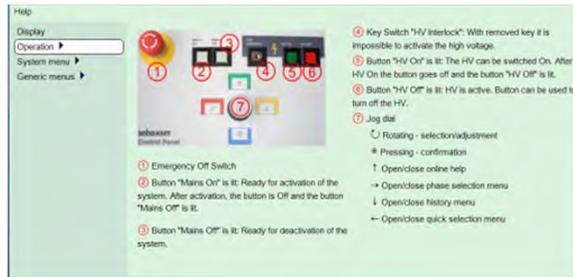

# Centrix 2.0

- Intuitive Central Control

# Centrix 2.0

- Step by Step User Guidance
- EasyGO Mode for inexperienced Users
- Workflow oriented Operation
- Integrated Quick Guide

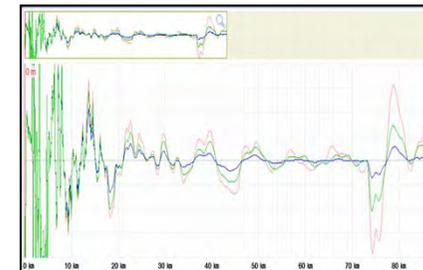

## Centrix 2.0

- **Maximum System Stability & Security**
- Linux based Operating System
  - ➔ No Bluescreen
  - ➔ No Anti-Virus Software necessary
  - ➔ No additional Costs for License Keys
- Stable, even after a Mains Failure
  - ➔ No UPS necessary (Uninterruptible Power Supply)
  - ➔ Re-starts without any additional System Check

## Centrix 2.0

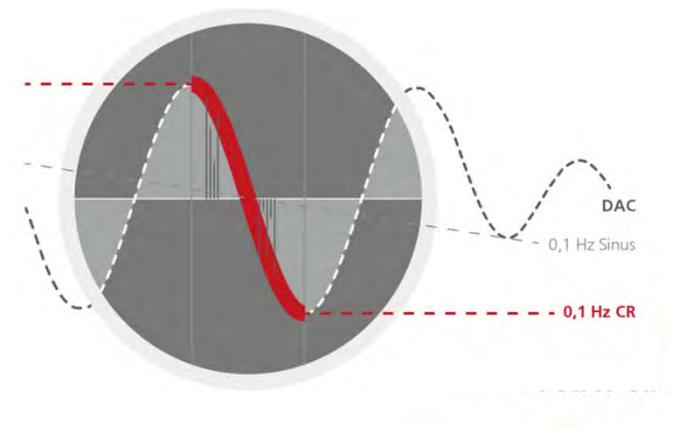

- **Special Fault Location Methods**
- **ARM – Multishot / Pro Range**
  - ➔ 15 Fault Traces per Surge Pulse
  - ➔ Length depending Gain Feature
- **ARMplus**
  - ➔ Double Surge Method up to 32 kV for Long Cables
- **DECAYplus**
  - ➔ Double Surge Method up to 80 kV for Long Cables
- **ARM Burning**
  - ➔ Live View of Burning Process at Fault Position
- **ICE Pinpointing**
  - ➔ Combined Prelocation & Pinpointing Method

## Centrix 2.0

### ■ Test & Diagnostic Module

- Standard Compliant, powerful VLF Testing with 5.5  $\mu\text{F}$  at 36 kVeff @ 0,1 Hz
- Internal tanDelta Measurement with automatic Test Interpretation conform to IEEE 400.2
- Partial Discharge Diagnosis with VLF Sinus, Damped AC or 50 Hz Slope-Technology (VLF CR)
- Monitored Withstand Test
- Apply VLF for measurement of insulation losses (tanD or insulation dissipation factor)

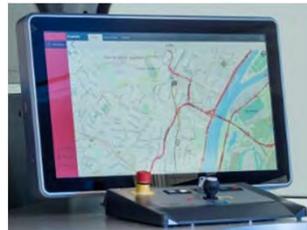

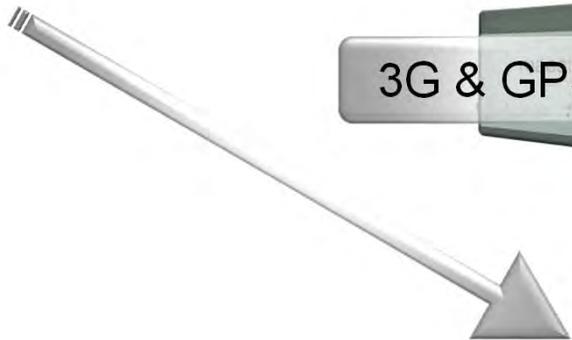

# Centrix 2.0

## ■ Remote Control

GSM / 3G

WIFI

3G & GPS Router

# Centrix 2.0

- **All inclusive Safety Strategy**
- Integrated Features to provide highest possible Safety
  - ➔ Key Interlock
  - ➔ Emergency Off Buttons
  - ➔ Status Indicator Lights
  - ➔ Analogue Voltmeter
  - ➔ Door Contacts
  - ➔ External Safety Unit

according to Standards  
DIN EN 61010-1  
DIN EN 50191  
BGI 891

**Megger**  
Power on

## Centrix 2.0

- **All inclusive Safety Strategy**
- Loop Resistance Monitoring (FOhm)
- Station Ground Voltage Monitoring (FU)
- Surrounding Area Voltage Monitoring with Voltage Time Integral (FU)  
(unique in Megger Test Van Systems)
- Mains Connector Box
- Separation Transformer
- Safe-Discharge Technology

# Centrix 2.0

## ■ MeggerBook Cable - Database Software

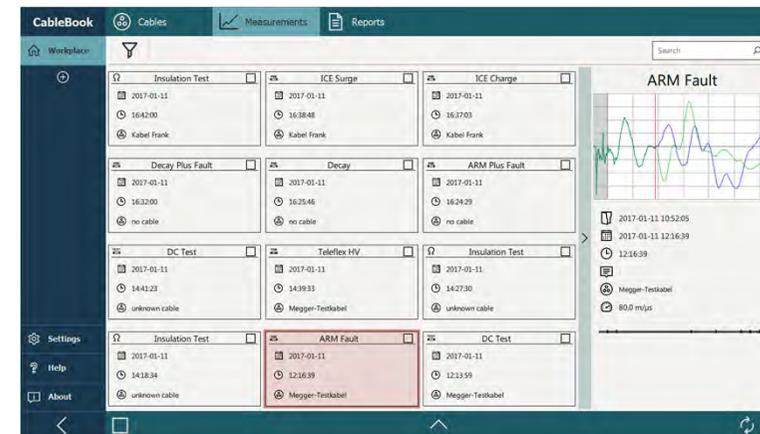

- ➔ Cable Manager
- ➔ Measurement Archive
- ➔ Report Generator/ Storage

## ■ Objectives

- ➔ All power related Data in one Database for easy Reporting & Storage

## ■ GPS based Map View

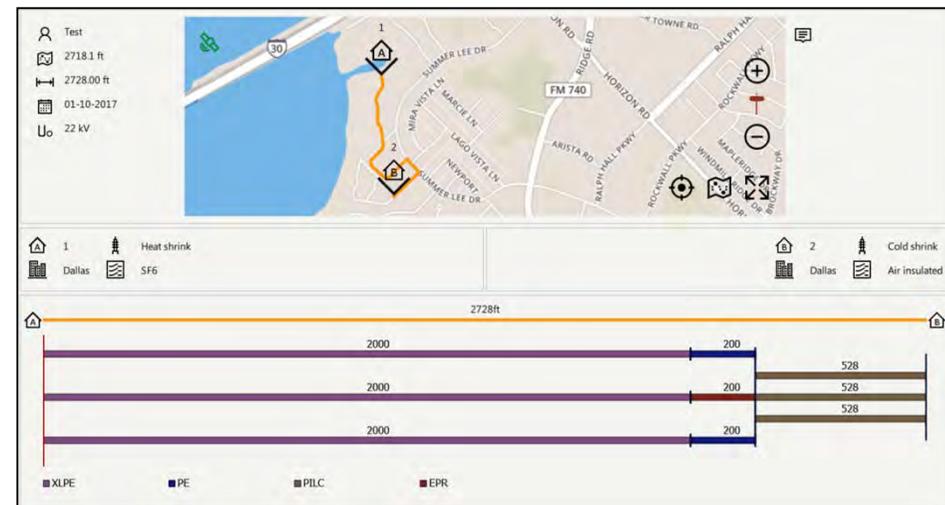

## ■ Easy Data-exchange between local & remote databases

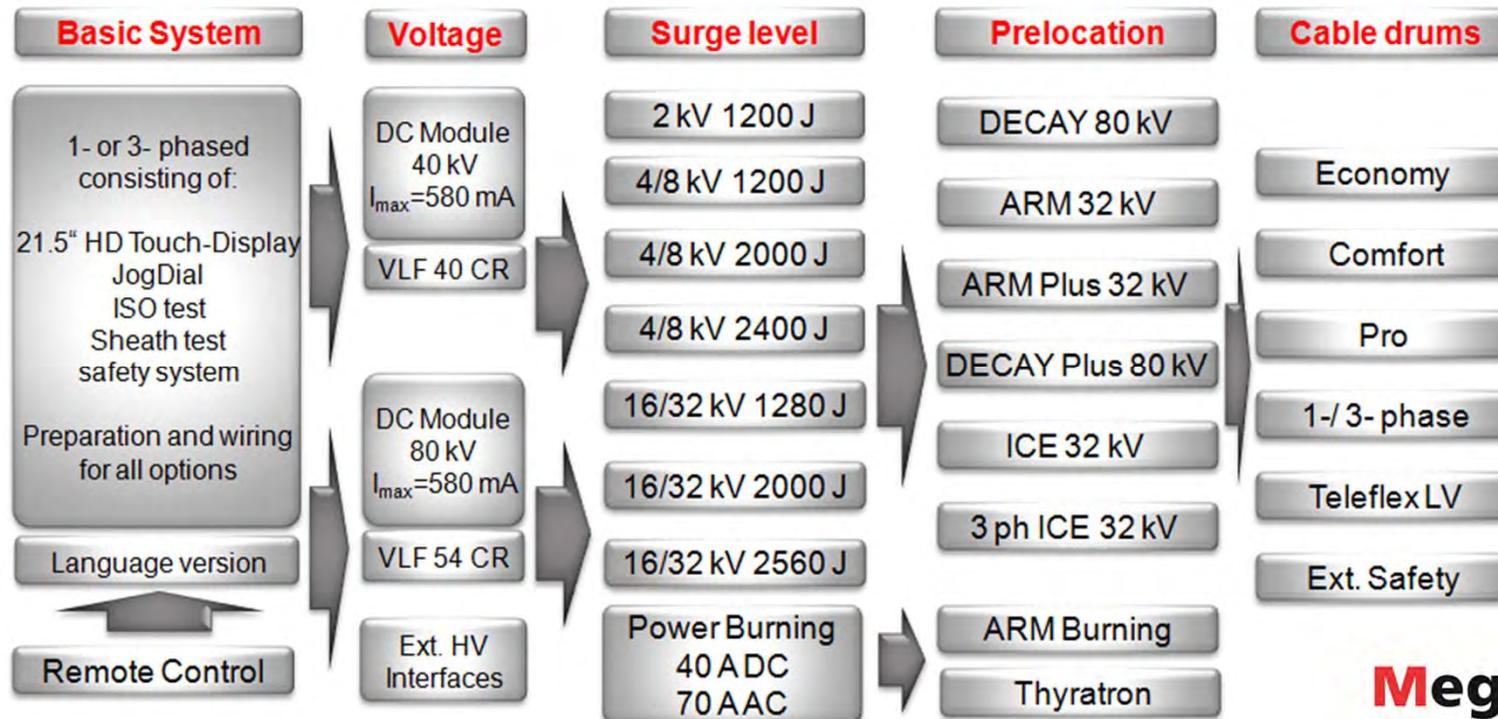

# Centrix 2.0

## ■ MeggerBook Cable - Database Software

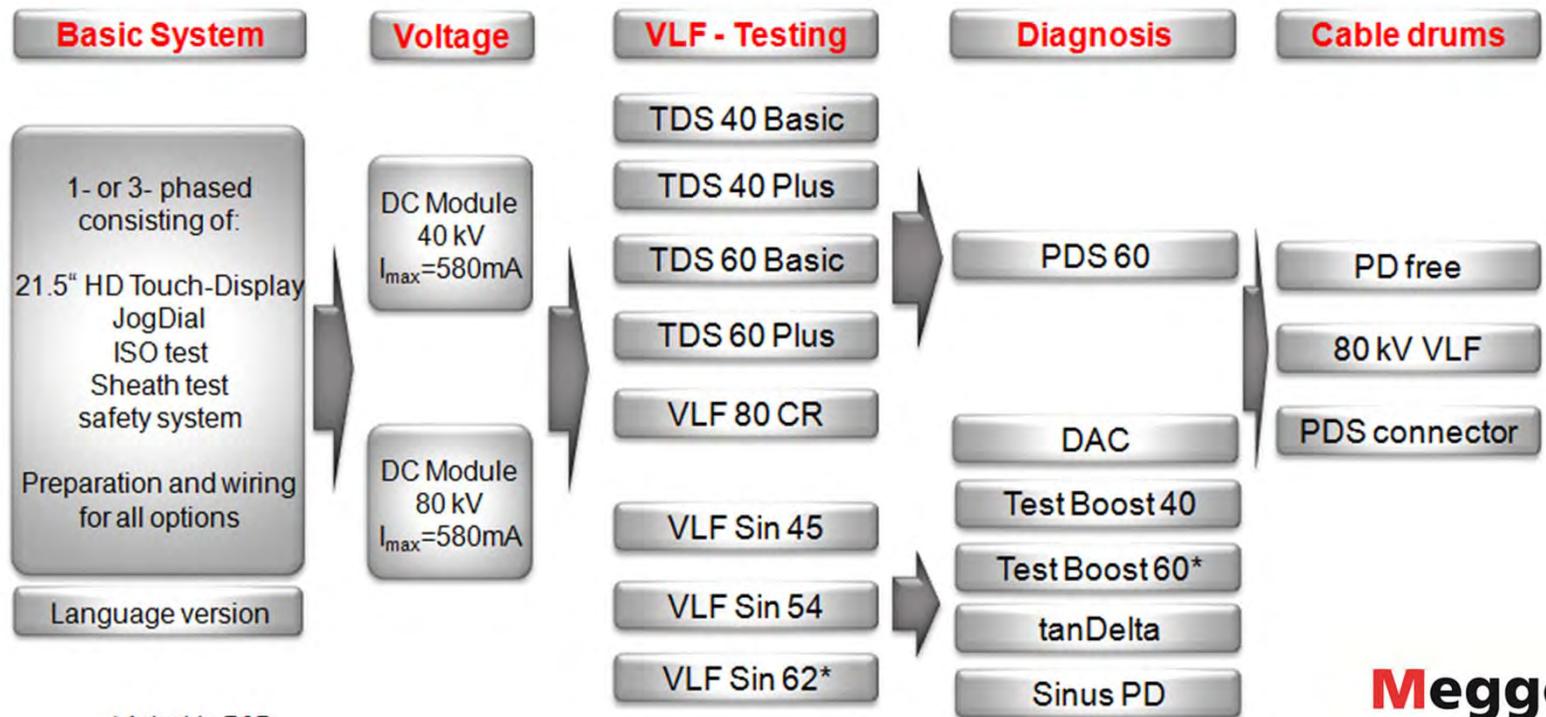

- Online/ Offline Maps (offline Maps available for all Areas)
- Easy way to create a Cable Trace
- Displaying the CTV position (GPS Module required)
- Fault Position (if Cable Trace is correct)

## ■ Standard System Options

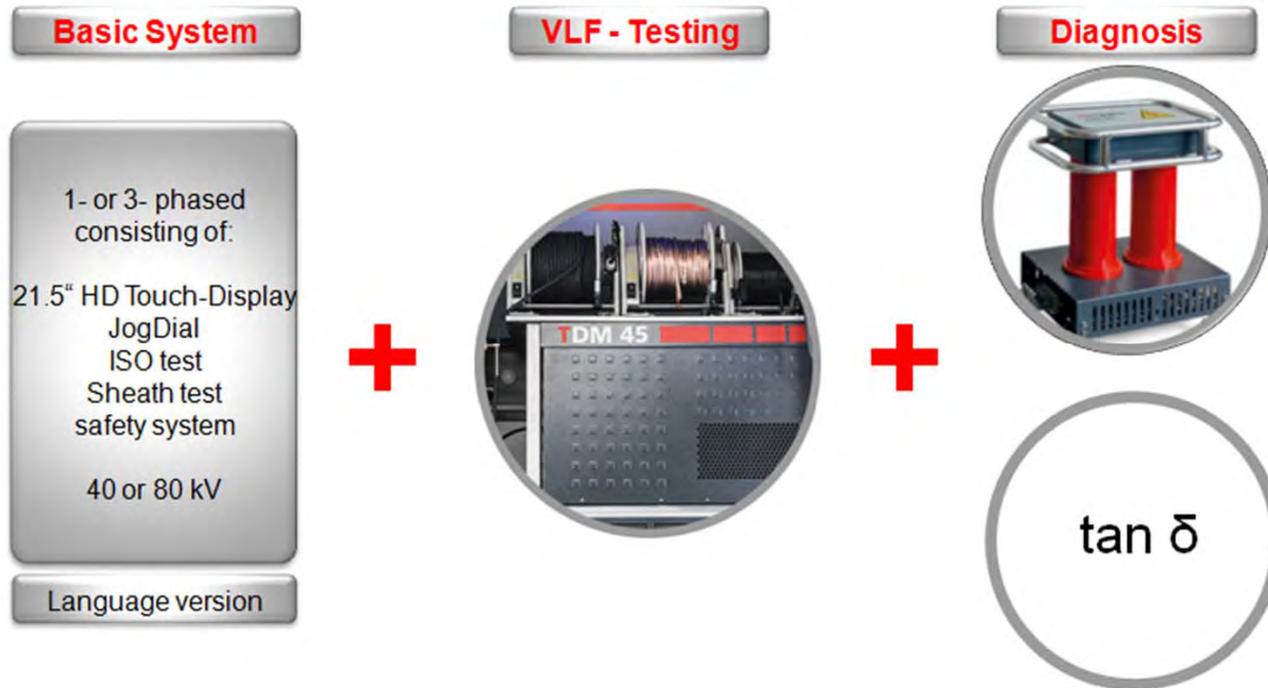

## ■ Test & Diagnostic Options

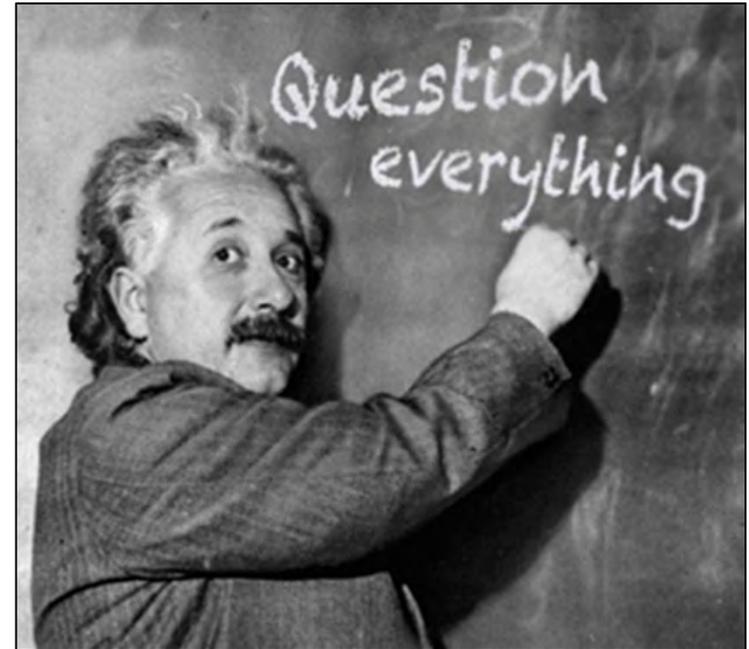

# Centrix 2.0

## ■ Combination System

# Question Time
